SUMMARY

Backend Software Engineer with 3+ years of experience building and scaling production microservices and distributed systems in fintech. Strong ownership across **system design, REST APIs, event-driven architecture, Kafka, Kubernetes, Go, Node.js, MySQL, Redis, reliability, performance optimization, and cloud migration**. At Paytm, owned zero-downtime EC2-to-Kubernetes migration and multi-bank credit-card integrations processing **100K+ applications/month**.

TECHNICAL SKILLS

Languages: Go, Node.js, TypeScript, JavaScript, Java, SQL, C++
Backend & Architecture: Microservices, REST APIs, Distributed Systems, Event-Driven Architecture, Async Workers, Webhooks, API Design
Messaging & Data: Apache Kafka, Consumer Groups, MySQL, PostgreSQL, Redis, MongoDB, Query Optimization, Caching
Cloud & DevOps: Kubernetes, Docker, AWS EC2, ArgoCD, CI/CD, HPA, Pod Autoscaling, Zero-Downtime Deployments
Reliability & Tools: Idempotency, Retries, Audit Logging, Observability, Prometheus, Grafana, Kibana, Postman, JIRA, Git

PROFESSIONAL EXPERIENCE

Software Engineer — Backend | Paytm, Noida **Sep 2025 – Present**

- **Owned end-to-end EC2 → Kubernetes migration** for Lending infrastructure (Resolver, Catalogue, Prefill, Credit Card Integration), achieving zero downtime through pod sizing, replica planning, HPA, rollout and rollback strategies.
- Executed parallel **database and Kafka consumer migrations** with zero message loss; handled consumer re-partitioning, data-integrity checkpoints, validation and service rollback runbooks.
- Engineered Go and Node.js microservices for a credit-card platform processing **100K+ applications/month**; REST APIs and asynchronous Kafka workers reduced end-to-end processing time by **30%**.
- Designed Kafka-based **event-driven architecture** for credit-card lifecycle events processing **50K+ events/day at 99.9% uptime**; optimized MySQL queries and added Redis caching to reduce **p99 latency by 40%**.
- Led HDFC, SBI, Axis, AU Small Finance Bank and RBL integrations covering consent, OTP, KYC/Perfios, Account Aggregator, status synchronization, retries and compliance workflows using **idempotency and audit logging**.
- Architected Axis Bank background workers for KYC polling, status sync, scheduled retries and compliance-data purge, supporting **500+ parallel jobs/batch** with configurable concurrency.

Software Development Engineer I | InsuranceDekho, Gurgaon **Mar 2025 – Aug 2025**

- Integrated ICICI Elevate and Care Ultimate insurance plans end-to-end, reducing time-to-market by **35%**; built premium-calculation and eligibility modules using Node.js and MongoDB.
- Built configurable premium rules with 20+ add-ons and optimized quote rendering for **50K+ daily quotes**, reducing generation latency by **20%** using caching, lazy loading and compression.
- Achieved **85%+ test coverage** on critical quote/proposal flows with Jest and standardized API contracts using Swagger.

Junior Software Developer | Akal Information Systems, New Delhi **Jul 2023 – Feb 2025**

- Built employee lifecycle and exit-management modules for TankhaPay, including onboarding, offboarding, final settlement, clearance and statutory deductions.
- Automated payroll disbursement, bank validation and reconciliation workflows, reducing payroll errors by **30%** and cycle time by **25%**.
- Introduced Redis caching on high-frequency employee and payroll endpoints, reducing API response time by **40%** under concurrent load.

EDUCATION

B.Tech, Computer Science — GL Bajaj Institute of Technology and Management **2019 – 2023**
CGPA: 8.67

PROBLEM SOLVING

LeetCode: 611 problems solved (547 C++, 56 MySQL, 8 Python3) | **HackerRank:** 5-Star in C++ and Algorithms | **DSA:** 500+ problems solved
